

LED Flexible Ribbon

LED Flexible Ribbon is an innovative product which incorporates a flexible circuit board and cutting-edge single color or RGB 3-in-1 SMD LED technology. The flexible PCB can be bent to a maximum radius of 2cm, LED Flexible Ribbon is dimmable with 12v dimmers or is controllable using linear modulation covering the entire RGB spectrum. LED Flexible Ribbon is designed for long linear applications, complex signage and structures convex, concave and other curved surfaces and objects. LED Flexible RGB Ribbon is a non-direct DMX controllable product.

RGB Waterproof Flat Ribbon

The waterproof LED flexible ribbon incorporates a silicon flexible circuit board and SMD LED technology. It can be bent to a maximum radius of 2cm. The SMD LED's are dimmable (255 levels) and color controllable using linear modulation covering the entire RGB visual spectrum
